

UMRETIYA
INDUSTRIES
Precision Fasteners

PRECISION FASTENER SOLUTIONS

BUILT FOR PERFORMANCE.
VERIFIED FOR RELIABILITY.

ABOUT US

Umretiya Industries specializes in high-tensile fastening solutions for infrastructure, automotive, solar, and industrial applications. Through rigorous quality assurance, complete material traceability, and adherence to international standards, we deliver reliable products that meet the demands of critical projects worldwide.

Driven by integrity, excellence, and customer focus, we are committed to building long-term partnerships and delivering consistent value to our customers.

MISSION

To engineer and deliver high-performance fastening solutions through our integrated manufacturing footprint and flawless supply chain execution. We bridge the gap between high-volume production lines and the world's most critical infrastructure projects.

VISION

To be the industry's most trusted global authority for high-performance fastening solutions, driven by technical expertise, rigorous standards, and consistent, on-time delivery.

CORE VALUES

Integrity

Excellence

Innovation

Reliability

Customer Focus

Continuous Improvement

ENGINEERING FASTENERS

High-tensile, stainless steel, and corrosion-resistant coated fastening solutions (Zinc Plated, Hot-Dip Galvanized, Black Oxide, PTFE) engineered for structural, industrial, and infrastructure applications, manufactured in compliance with DIN, ISO, and ASTM standards.

Hex Bolts & Screws

- Grade: 8.8 – 10.9
- Material: Carbon Steel
- Standards: ISO / DIN
- Application: Structural

Socket Head Screws

- Grade: Up to 12.9
- Material: Alloy Steel
- Precision: High Tolerance
- Use: Machine Assembly

Hex Nuts

- Type: Standard / Heavy
- Material: Carbon Steel
- Feature: Vibration Resistant
- Standards: DIN / ISO

Stainless Fasteners

- Grade: A2 / A4
- Property: Corrosion Resistant
- Use: Marine / Coastal
- Finish: Bright / Polished

Washers

- Type: Flat / Spring
- Material: Mild Steel
- Function: Load Distribution
- Standards: ISO

Custom OEM Parts

- Made to Drawing
- Full Traceability
- Custom Dimensions
- Industrial Grade

INDUSTRIES WE SERVE

SOLAR & RENEWABLE

Structural fasteners and anchoring systems designed for utility-scale solar parks, rooftop installations, and renewable energy infrastructure.

INFRASTRUCTURE

High-strength bolting solutions engineered for bridges, metro rail projects, highways, industrial structures, and critical infrastructure.

AUTOMOTIVE

Precision-manufactured fasteners meeting stringent performance, durability, and safety requirements for automotive applications.

OIL & GAS

Specialized bolting solutions designed to perform reliably in high-pressure, high-temperature, and corrosive operating environments.

MARINE & OFFSHORE

Corrosion-resistant fastening systems developed for marine vessels, offshore platforms, ports, and coastal infrastructure projects.

ENGINEERED QUALITY SYSTEM

Every product passes through a controlled engineering validation system designed to ensure consistency, strength, and performance in critical applications.

01. MATERIAL CONTROL

Certified raw materials with chemical and mechanical verification before production approval.

02. MANUFACTURING CONTROL

Controlled forging, machining, and threading with strict dimensional monitoring at every stage.

03. TESTING & VALIDATION

Tensile, hardness, torque, and load testing performed as per international standards.

04. SURFACE ENGINEERING

Coating systems including Zinc, HDG, Black Oxide, and PTFE for corrosion protection.

GLOBAL COMPLIANCE

ISO 9001:2015

DIN STANDARDS

ASTM COMPLIANT

IS SPECIFICATIONS

TRACEABILITY SYSTEM

ROHS COMPLIANT

GLOBAL REACH

Umretiya Industries supplies high-performance fastening solutions across multiple international markets through a strong and reliable distribution network.

Global Logistics

Seamless supply chain execution bridging high-volume production lines to critical infrastructure projects worldwide.

Quality Documentation

Every international shipment is supported by complete material traceability and NABL/Third-party inspection reports.

Trusted Globally

A trusted fastener supply partner for EPCs, fabrication units, and OEMs operating across global markets.

CORPORATE OFFICE

Mumbai, Maharashtra, India
